

F4OR

Fit For Offshore
Renewables

12TH FEBRUARY APPLICATION DEADLINE!

FIT FOR OFFSHORE RENEWABLES: BUSINESS GROWTH SUPPORT FOR NORTH EAST COMPANIES

As part of the Technology, Innovation and Green Growth for Offshore Renewables (TIGGOR) programme, businesses located in the North East* can access the Fit 4 Offshore Renewables (F4OR) programme.

F4OR supports the development of an increasingly competent, capable and competitive UK offshore renewable energy supply chain – maximising opportunities for the UK supply chain, both domestically and globally.

What is the TIGGOR F4OR programme?

The TIGGOR F4OR programme is specific to companies in the North East of England as part of a larger programme of business support being delivered by the Offshore Wind Growth Partnership (OWGP) alongside the North East Local Enterprise Partnership's Growth Hub.

For more information on this programme and how to apply, please visit:

> owgp.org.uk/about/north-east-business-growth-programme-tigger

F4OR OVERVIEW

- // Business process and sector specific competence improvement and assessment programme
- // Assessing and developing core business processes and capability to meet offshore wind sector requirements
- // 12-18 month programme, aimed at established companies who have scope to grow significantly in offshore renewables markets
- // F4OR targeting 'high potential' new or recent entrants to the sector

*Within the North East LEP area:
Northumberland, North Tyneside, Newcastle,
South Tyneside, Gateshead, Sunderland, Durham
